"The Big Tune"

HERE'S a letter from 2LO London to James A. Gons of Trenton, New Jersey—confirming his reception of the London station with his Radiola III. This is big performance for two tubes! It doesn't happen every day, but that people do get such reception shows what a mighty good set the little Radiola III is. It's dependable for good performance day in and day out—for clear tone, for distance, for sensitivity, too. And every so often it breaks a record! Don't wait till you can afford a big set. Tune in right now on a Radiola III at \$35.

Radiola III
